

Mines of the County

The Empire Flat people have settled up their differences and are getting to work on the mines on the lower Bill Williams Fork. The mines are reputed to be among the richest copper properties in that country.

Mrs. John Kay and children, of Mineral Park, was in Kingman yesterday. Mrs. Kay is the owner of considerable rich copper property in the Mineral Park country and for years past devoted all her energies toward developing the mines.

William O'Dea is in Kingman from his mines at Pilgrim Camp. He reports that he and partner have a shaft 110 feet deep and that the ore in the bottom is far better than on the surface. The group of mines are the most promising ever struck in this county.

Otto Kubin, one of the large owners in the Standard Gold mining company, returned a few days ago from a visit to the property and departed this morning for his home in Chicago. He examined the big mills at Gold Road and Leland and was well pleased with the outlook at these places.

A prospector has located a promising vein of gold ore near the old Blue Marie mine, in the Cedar country. The vein is said to be four feet in width and carries values as high as fourteen ounces gold to the ton. It is situated near the new road to Cedar and in a most accessible part of that country. Several Yucca men have been looking at the new find and believe it is one of the best in that section.

It is expected that the ledge on the San Francisco, at the 401 level, will be cut today. The electric drill broke down a few days ago and the work has been delayed pending repairs. It is believed that great ore will be found in the vein at this point and that the future of the mine is now assured. In all the other levels splendid ore has been blocked out.

N. H. Snow, an expert zinc miner from Wisconsin, arrived in Kingman Wednesday morning with his family and in company of H. W. Kemper made an examination of the zinc mines of the Stockton Hill country, especially the De la Fontaine. He was much pleased with the zinc outlook and appeared to be satisfied that a big production could be had. Mr. Snow is interested in the zinc reduction plant in Illinois.

The Mohave Consolidated Mines company has let a contract to sink 50 feet on the J. F. T. mine, near Stockton Hill. The shaft is now 50 feet deep. Walter Overcamp is the contractor. The company is doing considerable work on the property and is showing up bodies of copper ore. This company was recently organized with a capitalization of 1,500,000. George Q. Adams, who has been in charge of the work here, is the vice president and general manager.

There is now a possibility of the installation of a large electric power plant in Kingman for the purpose of furnishing power to a number of mines in Wallapai mining district and possibly to Gold Road. The parties having the matter under consideration are amply qualified to handle the deal. By the installation of such a plant mine owners and operators can be furnished with power at a minimum cost and without the costly expense of installing steam or gasoline power at the mine.

E. P. Ripley, A. G. Wells, John Dair and several other gentlemen made an examination of the Maguire and other mining claims south of Kingman a few days ago. It is rumored that a milling plant will soon be erected on the mines and that work will be in progress in exploiting the veins north of the track, near McConnel, just as soon as machinery can be rushed in. Several of the mines owned by the Sorpresa company show good values and it is the belief of mining men that big ore bodies will be opened up at depth.

Inflammatory Rheumatism Cured.

William Shaffer, a brakeman of Denison, Ohio, was confined to his bed for several weeks with inflammatory rheumatism. "I used many remedies," he says. "Finally I sent to McCaw's drug store for a bottle of Chamberlain's Pain Balm, at which time I was unable to use hand or foot, and in one week's time was able to go to work as happy as a clam." For sale by H. H. Watkins.

W. H. Cushing, president of the Stockton Hill mining company departed for his home in Topeka last Tuesday morning. He took with him a large lot of samples, which he will have tested by the magnetic process at Denver. It is proposed to put in this method of separating the zinc from the lead and gangue and a reducing plant will soon be installed. The company is working a small force of men on the mine and sinking will be resumed within a few days. M. Hughes has been put in as foreman of the property. Mr. Hughes is a capable mine manager and will undoubtedly make good head way in opening up the property.

The Cedar Valley mining company has opened up a splendid body of silver-gold ore in the old workings of the Queen mine, at Cedar. Samples from the vein gave returns of more than 600 ounces silver and some gold. The company is now rushing work on the new wagon road, a large force of men having been put to work on the south end this week. From now on everything will be rushed ahead as fast as possible to prepare for the installation of the new reduction machinery. The mines will be opened up just as fast as men can do the work. The property is a good one and the new owners intend to make it a dividend payer.

Last Wednesday morning ten boats loaded with members of the geological survey outfit, operating near Parker, passed down the river from Mellen to take up the work of locating the site for the first big dam to be built on the river. The party was abundantly fitted out for a long stay on the river and will undoubtedly finish up the work before the first high water comes. Many people are now preparing to open up for business at the proposed site and before work is commenced it is expected that quite a settlement will have sprung up there.

It is rumored that work on the railroad from Congress Junction to Parker, on the Colorado river, will soon be under way. The line has been surveyed and there is a possibility that grading will be commenced from both ends of the line, all supplies for the west end being taken in by way of the Colorado river. The line will enable the government to construct the big dam at a much less cost than present conditions will allow of and will open up a wonderfully rich mineral country.

A Favorite Remedy for Babies.

Its pleasant taste and prompt cures have made Chamberlain's Cough Remedy a favorite with the mothers of small children. It quickly cures their coughs and colds and prevents any danger of pneumonia or other serious consequences. It not only cures croup, but when given as soon as the croupy cough appears will prevent the attack. For sale by F. H. Watkins.

WEAK AND LOW SPIRITED.

A Correspondent Thus Describes His Experience.

"I can strongly recommend Herbine as a medicine of remarkable efficacy for indigestion, loss of appetite, sour taste in the mouth, palpitation, headache, drowsiness after meals with distressing mental depressions and low spirits. Herbine must be a unique preparation for cases such as mine, for a few doses entirely removed my complaint. I wonder at people going on suffering or spending their money on worthless things, when Herbine is procurable, and so cheap." 50c a bottle at H. H. Watkins' drugstore.

Stockholders' Annual Meeting.

Notice is hereby given that the Stockholders' annual meeting of Tarr & McComb, Inc., will be held at the office of the Company, 407 Copp Bldg., 218 So. Broadway, Los Angeles, Cal., on Tuesday, March 15th, 1904, at 10 o'clock a. m., for the purpose of electing directors and for the transaction of such other business as may properly come before the meeting.

N. W. TARR,
Secretary.

Kingman, Feb 5th, 1904.

Anson H. Smith has been appointed agent of the Western Iron Works, of Los Angeles, California, and is now prepared to figure with mine owners on the installation of gasoline engines, pumps and pump supplies.

Notice.

Notice is hereby given that the properties known as the Elkhart or Arizona Bullion Mining Company, situated in the Wallapai mining district, Mohave County, Arizona, will not be responsible for any labor or debt contracted, nor injuries sustained by any employee in working said property. And that no employer or employee is the agent of the owner for any purpose, and that all employees engage in such service at their own risk, and that no debt or claim of debt is valid unless authorized over my personal signature.

J. H. McNEIL,
Kingman, Ariz., March 4, 1904.
